

The Hunter Lab at The Rowland Institute at Harvard is now accepting applications for a Postdoctoral Fellow position starting **Fall 2020**.

The Hunter Group focuses on developing molecules and materials for sustainable large-scale industrial processes, such as solar-driven seawater splitting, electrochemical nitrogen fixation and CO₂ reduction, and selective hydrocarbon oxidation. The position will involve synthesis and characterization of molecular and heterogeneous catalysts. Candidates with expertise in all related areas of inorganic and materials chemistry are encouraged to apply. Knowledge of and/or willingness to learn the following skills is desirable:

- Laser spectroscopy (broadly defined)
- Electrochemistry
- Characterization of materials (e.g. XRD, XPS, and related spectroscopies)
- Air-free techniques (glove box, standard Schlenk maneuvers)

The candidate will benefit from the experience of close contact with the PI (Dr. Bryan Hunter), and the interdisciplinary environment fostered at the Rowland Institute at Harvard and Harvard University.

Applications will be considered beginning **October 1, 2020** and will be considered until the position is filled.

To apply, enthusiastic candidates with a Ph.D. in a relevant field should email the following to bhunter@rowland.harvard.edu.

- Cover letter
- Curriculum vitae
- Contact information for at least 2 references

EEO Statement

Harvard University is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
